

# Allard AFO

## - produced with 100% renewable energy

For more than 25 years we have provided individuals who suffer from gait impairment with support for better life through our Allard AFO's. For us, Support for better life extends well beyond the product itself.

At our manufacturing site for Allard AFO, we take actions to support a sustainable environment and strive for environmentally efficient manufacturing.

We are proud to say that our Allard AFO's are produced with 100% renewable energy from wind, solar and hydro energy sources, resulting in a 95% reduction in CO2 emissions\*.

This is our way of providing  
**support for better life**  
- today and tomorrow.

*\* when compared to utilising non-renewable sources.*
